+ LAN SHAN About Us

Lan Shan Enterprise Co., Ltd is a professional manufacturer based in Taiwan, specializing in the production of residential, commercial, and industrial water filtration systems, RO water systems and water purifiers.

Our expertise lies in the field of water treatment, particularly in the application of reverse osmosis (RO) technology. RO systems are widely recognized as effective water filtration systems that remove impurities and contaminants, providing clean and pure drinking water. We are devoted in developing and manufacturing the different demand of RO systems by our professional experience and knowledge.

We also provide different of RO system components and parts, such as RO membranes, filter cartridges, booster pumps and other necessary components for RO systems. Depends on the customers demand, we can provide the customized components as well.

With our focus on quality, service, and innovation, Lan Shan Enterprise Co., Ltd aims to provide customers with reliable and efficient water filtration systems, RO water systems and water purifiers. Our comprehensive product range can satisfy with the diverse demand of residential, commercial, and industrial clients.

an Shan Core Values

The brand logo of Lan Shan features three mountain peaks. The design represents our values of high-quality products, exceptional service, and continuous innovation.

High-Quality Products I Mountains are often associated with reliability, reflecting Lan Shan's dedication to delivering reliable and effective water treatment solutions.

Exceptional Service I Mountains also symbolize strength and dependability, representing that Lan Shan can be a reliable partner and provide outstanding support and assistance.

Continuous Innovation I Mountains symbolize challenges and the pursuit of new heights. Lan Shan is committed to exploring new ideas, technologies, and solutions in the field of water treatment, to satisfy different customers' demand.

IC Light

+ New Filter RO System

Product Advantages

For Customer

- 1.The new filter is more efficient than standard filter to filter water because the new filter's outside diameter and the area of filter are bigger than standard filter.
 Therefore, the new filter is able to increase the work efficiency to filter water.
- 2.The new filter has a greater effect to prevent the filter from blocking that can protect the RO membrane and booster pump.

For Agents And Retailers

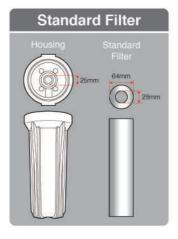

- Retailers and agents are able to utilize the new filter's competitive advantages to promote it on the market easily.
- Once customers use the new filter RO system, they have to come back to buy filter from agents or retailers. For agents and retailers, they can increase profits and customer's loyalty.
- 3. Retailers can sell the higher price to customers because of the better product and unique size.

Case in Taiwan

Ten years ago, most retailers sold the standard filter RO systems to customers and did not realize the trend on the market. Now, they have to face the strong competition from shopping mall or supermarket.

Users prefer to buy the cheaper standard filter from the shopping mall instead of buying from the retailers. Therefore, in Taiwan, most retailers have realized this risk on the market.

So, they try to promote the new filter RO systems for securing long-term business relationship with customers.

Item No.	Cartridge	Description		
LS-BB203AS	PP/GAC/CTO	Mounting Bracket ; *Stainless steel, welded construction		
LS-BB203ASC	PP/GAC/CTO	Housing: 20" Big blue Inlet / Outlet: 3/4",1",1-1/4",1-1/2"		

*Stainless steel: SS-304(optional--->SS-316)

Extra Optional: Pressure Gauge, Brass Thread

3 Stage 20" Big Blue Water Filter SS Cover

+ Shower Filter

SF & SW Series

Product Specialty

Protect yourself and your family from the toxic effects of chlorine in your shower water.

The patented filter media, KDF-55, has been laboratory tested to consistent remove of free chlorine from your shower water.

This easy to change cartridge is Ø2-1/2"x4"L.

Available with a chrome plated brass showerhead.

SW-02 Shower Head

SF-008/SF-008CP Shower Filter Set

Size I Ø7.7xH13.1cm Operating Pressure I 20-80 psi Operating Temperature I 5~38°C Flow Rate I 5-10 L / min Filter I 20g KDF + 40g Calcium+ 50g GAC Expected Life I 4~6 months

O3 Ozonize +

Drink.Style

What's ozone?

Os is so-called Ozone, which means fresh oxygen. The gas is in low thickness and colorless under normal temperature, and sometimes smells like grass. Its strong oxidization ability, next to fluorine, decomposes toxins (exchanging electron) fast. Furthermore, the capability to kill bacteria, used for killing germs, mold, golden staphylococcus and colon bacillus. The transformation into oxygen won't cause remains, avoiding second pollution. So Os is called no medicine processed.

Appearance I

- 1.ABS plastic-injected construction, light-weighted, handsome, durable and oxidization resistance.
- 2.Lay still on the table or mounted onto the wall, continent, easy manipulation and space-saving.
- 3. Portable design; power cable is separated from the machine, easy to put away.

Functions I

- 1. Micro-computer touch panel, easy to manipulate.
- 2. When plugging, self-inspecting circuit can point out the breakdown.
- Three-phase adjustment for ozone thickness.
- 4. Multiple time setup and automatic power switch options, taking care of your life all day long.

Features I

- 1.Built-in circuit breaker.
- 2.Ozone generator constructed with ceramic clearance discharging and equipped with low-pressure, high-frequency and noiseless discharging adaptor, silent, stable corona radiation, humidity resistance and durable.
- 3.Air pump is made of anti-oxidization materials, noiseless, strong blowing; inner poison-free tube for air delivery; air filter and shut valve keep the air clean.

Your life with Ozone I

- 1. Decomposes pesticides, taking care of your health.
- 2.Sterilizes houseware.
- 3. Prevents meat from getting rotten, and decomposes toxin.
- 4. Water treatment.

OWA-350 Industrial Ozonize

+ Industry

Industrial Water Equipment

LSRO-3000GPD

Industry RO System

Stainless steel costruction. Complete inspection before delivery. Suitable for industrial and commercial uses.
 Start working once installing, cost-effective type.
 Pressure I 150-220 PSI

Removing Rate I >97% (organic substance 99.9%, colloids bacteria above 99.9%, heat source above 99.9%)

Requiring Rate I 50~70%

SC Series ■

Product Features

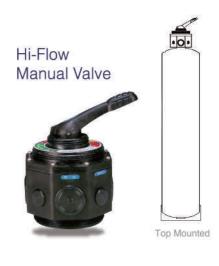

- 1. Simple mechanical design is easy to understand.
- 2.Two valve body designs, one for down flow regeneration and one of up flow, cover every valve in the 5600 family quick access to all internal components.
- Injector/drain modules containing the brine valve, flow controls and injector are removable from the valve's exterior.
- 4.Ruggedly built timer is designed with heavy duty 3/8" wide plastic gears.
- 5.5600 controls are user friendly and easy to program.
- 6.Non-corrosive, UV resistant, Noryl® valve body.
- 7.Choice of 12-day time clock or demand regeneration with either mechanical or electronic meter.

Faucet+

Kitchen / Drinking

2 Way Faucet

An exquisite design enhances convenience in your life.

This streamlined style provides a clean and uncluttered appearance to your sink and counter.

Enjoy the convenience of accessing hot / room, tap / RO water with one single faucet.

3 in 1 Faucet (Hot / Room & R.O.)

A elegant design makes your life more convenient. Do not need to drill another hole from the counter when installing R.O. System.

The simple way to make your sink and counter look clean and not complicated anymore while one faucet is able to serve hot, room and R.O. water.
